Procedure

1.0 SCOPE

1.1. Injury is the recognized leading preventable health problem the children of this country and basic information describing the who, when, how and where of injury are lacking in an organized and useable form in most locales. This lack of basic data seriously inhibits our ability to prioritize, ascertain high risk groups, devise prevention strategies and make outcome-based evaluation of prevention efforts difficult at best. The CCHMC outpatient injury registry was developed to help address these problems in Cincinnati.

2.0 DEFINITIONS

2.1. The CCHMC Outpatient trauma Registry has reportable data as of January 1996. The database contains information for all children who were treated and released at CCHMC emergency department, including Liberty campus and the urgent care sites

3.0 PROCEDURES

3.1. ICD-9 Diagnoses **inclusions**:

    3.1.1. ICD-9 injury diagnosis range of 800.00 - 995.09 (range was expanded from the traditional 800.00 – 959.9 to include poisonings and cases of child abuse.

3.2. ICD9 injury diagnosis that are **excluded** from registry;

    3.2.1. ICD9 range 930-938 (**foreign body** entering through orifice),
